

SEER

Safety
Electronic
Exchange
Resource

SEER is an online resource available on a subscription/cost basis that enables members to access information, exchange requests and conduct business through this facility.

Information available will consist of:

- * Case Studies, Accident Details across Industry Sectors.
- * Strategic Planning articles.
- * SafetyMAP details.
- * Checklists for various workplace safety issues.
- * Legislative outlines:
 - **Workers' Compensation case histories**
- * Online training currently limited to:
 - **General Induction Course**
 - **Duty of Care**
- * Publications for downloading:
 - **Plain English Guide to Workplace Health & Safety Act.**

Cost structure is as follows:

- * **Online Training:**
 - Induction Course = **\$55.00**
 - Duty of Care = **\$35.00**
- * **Publication**
 - Guide to Act = **\$75.00**
- * **General Information**
 - Monthly Fee = **\$75.00**

MEMBERSHIP OF SEER – GENERAL

Is based on annual subscription payable on a monthly basis for access to the various information that goes to make up SEER.

Works on the basis of an application to Kirwan & Associates to become a member of SEER.

You will then be allocated a Personal Identification Number (PIN) that is your password – this will allow you to access SEER within our web site. Membership fees are payable on a monthly account and if outstanding over five days the password access will be revoked.

Note: Kirwan & Associates reserves the right to decline membership.

MEMBERSHIP APPLICATION

Please note the following conditions that apply to membership.

1. Copyright – whilst realising that we have made information available the restriction on that freedom is that it relates only to the applied membership.

Any use outside that scope will be in breach of our conditions for use.

Applicant Name: _____

Title: _____

Employer Organisation: _____

Industry Sector: _____

CONTACT DETAILS

Address: _____

Phone: _() _____ **Fax:** _() _____

E-mail: _____ **Web:** _____

Any areas of special interest:

SEER – ONLINE PUBLICATION

In the early stages of our web site we have only one publication that can be downloaded from the site.

Plain English Guide
Workplace Health & Safety Act 1995, Tasmania

Converting complete legislation into plain english is a specialty area of expertise based on 20 years of know how.

If you have a specific requirement for a conversion project or even an in house publication required, e-mail the details and we will provide a costing.

SEER – ONLINE TRAINING

In the initial stages of the development of this site, training courses available are restricted to two:

- 1. General Induction Course**
- 2. Duty of Care – means???**

If you require a specific on line course then e-mail details to us and we will provide a costing.

With 20 years experience we can deliver a tailor made product for your company.

Case Studies

Segmented into Industry categories this resource will be compiled from various sources to provide practical outlines on events/solutions that have occurred.

Accident Histories

Segmented into Hazard categories this resource will be compiled from prosecutions, court actions, workers' compensation claims and customer supplied information.

Safety Alerts

Using the Hazard categories these alerts will be compiled from a wide ranging resources including other web sites.

Workers' Compensation Cases – Tasmania only

Case histories on an abridged basis will be drawn from decisions handed down by the Workers' Compensation commissioner.

SafetyMAP

There is considerable debate about what SafetyMAP is and its purpose.

This component of SEER will provide information on SafetyMAP – what it is, how it can be used and why it can be useful

Checklists

The aim of this information resource which is drawn from various sources is to assist in providing documents that can be used in the workplace to improve/monitor safety aspects.

The checklists are split up into Industry categories.

Strategic Planning

The approach to workplace safety has changed dramatically over the past decade both as a result of legislative obligations and the more enlightened attitude on what is needed to create and maintain improvements.

There will be a series of papers that will cover current developments as well as concepts to be applied in the workplace.
